# NCM Compost Accelerator 908

Our new 908, powder composting accelerant, contains a specially formulated blend of highly-active enzyme producing bacteria, nutrients, microorganisms & micronutrients that synergistically accelerate the natural compost degradation cycle. With regular application, our NCM 908 will produce nutrient rich, soil improving humus in 6-9 weeks, even in large compost piles where there's increased temperature and lower levels of oxygen. NCM 908 contains no chemicals or pesticides, it is 100% all natural and safe for humans & the environment.

\*NCM 908 is effective in accelerating almost all organic materials including, but not limited to: fruit and vegetable waste, yard waste (wood chips, lawn trimmings, grass clippings), manure, aquatic weeds (harvested), egg shells, shredded newspaper. Some waste that you should NOT put in your compost are: meat scraps (including fish), pet waste, dairy products, cooking oils, plastic bottles or caps, diseased plants or food wrappers. Any one who farms and or gardens can benefit from composting. Compost can even be added around trees and in house hold potted plants to improve growth and produce more luscious plants.

## Benefits of NCM 908:

- 100% All Natural
- Fast Acting
- Saves Space
- Makes Composting More Economical
- Non-Corrosive / Non-Acidic
- Environmentally Friendly

## Specifications

Form: Free-flowing granular powder

Color: Brown

Nutrient Content: Micronutrients & Biological Stimulants and Enhancers

Plate Count: Five billion per gram

## Application:

**Large Compost Piles:** Mix 25 lbs. of product with water per 1000 cubic yards of waste and spray on compost heap.

\*Make sure to keep your compost heap moist and turn it regularly.
