

TERRA FOAM

The Remediation Solution

TECHNICAL DATA

GENERAL DESCRIPTION:

Terra Foam is a proprietary formulation that has been developed and proven to be effective in diverse odor elimination applications from environmental remediation, agricultural waste, industrial pollution to major landfills and composting. The product is designed and formulated for application as a saturation foam for surface application during environmental remediation, pre transfer treatment of waste and municipal sludge and other type of solid or odorous solid waste or by-product. The foam generated is absorbed into the surface and has low water content to minimize liquid loading in transport applications. *Terra Foam* contains food grade propylene glycol. All other active components are natural occurring or FDA GRAS listed components such as food additives, natural botanicals and compatible essential oils. All emulsifiers and foaming agents are biodegradable.
